

OVERVIEW

Calibre Mining Corp. is a Canadian based exploration and development company listed on the Toronto Venture Exchange (TSX.V: CXB). Calibre's mission is to create shareholder wealth by leveraging our experience to acquire, explore and develop strategic gold and copper assets in a safe and sustainable manner.

THE BOROSI PROJECT

In July of 2009, Calibre acquired a commanding and strategic, 710 sq kilometre concession package in the highly prospective, but underexplored "Mining Triangle" of North East Nicaragua. The **Borosi Project**, named for the three historical producing regions of Bonanza, Rosita and Siuna, is highly prospective for gold and copper mineralization and combined produced over 5 million ounces of gold, 4 million ounces of silver, 310 million pounds of copper, and 210 million pounds of zinc. With the acquisition, the past producing mines and surrounding areas of Siuna and Rosita become part of Calibre's portfolio.

Calibre subsequently entered into a joint venture agreement with B2Gold Corp. to further explore and develop the project. Under the terms of the agreement, B2Gold may earn a 51% interest in the Borosi concessions by completing C\$8 million of exploration expenditures over a three year period. The first year of the agreement calls for an exploration commitment of C\$2.5 million, with Calibre acting as operator.

The Borosi project area has the potential to host two major types of mineral deposits: low sulphidation epithermal gold and silver veins; and gold copper skarns and associated porphyry mineralization. Borosi has been subdivided into four target camps based on the dominant geology and mineralization styles; Eastern Epithermal, Bonanza, Rosita and Siuna Camps. A systematic and disciplined exploration campaign is underway to define drill targets and launch an aggressive drill program in the first quarter of 2010.

PROJECT HIGHLIGHTS

Eastern Epithermal Camp

- ~ Four areas of low sulphidation veining with over 18km of total strike length.
- ~ La Luna trenching results: 3.5 g/t Au over 12m
- ~ Grab samples of up to 46 g/t Au
- ~ Includes the past producing mines of Riscos de Oro, El Blag, and La Luna

Rosita Camp

- ~ Past producing Santa Rita and R-13 copper mines
- ~ Bambana Gold Copper target
 - Channel sample returned 1.64 g/t Au, 1645 g/t Ag, 29.9% Cu, 3.2% Zn over 0.9m

Bonanza Camp

- ~ Three epithermal vein targets immediately on strike of the historic Bonanza gold mine

Siuna Camp

- ~ Past producing La Luz Mine
- ~ Two advanced drill targets; Cerro Potosi and Cerro Aeropuerto
 - CA07-01: 19.72 g/t Au over 3m and 5.75 g/t Au over 24m
 - CA07-02: 25.08 g/t Au over 2m and 16.94 g/t Au over 2.2m

SHARE STRUCTURE

As at	November 6, 2009

MANAGEMENT

Over 160 years combined experience in mineral exploration, advanced project development, project finance, and public company management.

Robert Brown, B.Sc. (Geology), MBA, *President & CEO, Director*

16 years experience in mineral exploration, business corporate development, advanced project development, and portfolio management

Douglas Forster, M.Sc., P.Geo, *Chairman*

30 years experience in mineral exploration, project development, public company management, mergers and acquisitions, equity finance

Blayne Johnson, *Director*

23 years experience in Investment banking, natural resource finance, and mergers and acquisitions

Hon. John Reynolds. P.C., *Director*

35 years experience in the Canadian Political Establishment, Member of the Queen's Privy council for Canada

John A. McDonald, Ph.D., P.Geo., *Director*

40 years experience in global project exploration management, former University Professor of Geology

Edward Farrauto, CGA, CFO, *Director*

18 years experience as senior finance officer in private and public resource companies, extensive experience in compliance, prospectus filings, reverse takeovers
