**Note:** Estimated True Widths ('ETW') for reported vein intercepts are based on 3D models of the individual veins. Estimates are determined in cross-section by measuring the modelled vein thickness perpendicular to the vein margins and through the midpoint of the drill hole intercept. Percentage based differences between individual ETW's and down-hole interval lengths will vary between drill holes depending on drill hole inclination, variations in vein strike and dip, and overall geometries of the different vein systems.

**October 31 – Drill Hole Collar Coordinates**

<b>Drill Hole ID</b>	<b>Prospect</b>	<b>UTM East (m)</b>	<b>UTM North (m)</b>	<b>Elevation (masl)</b>	<b>Total Depth (m)</b>	<b>Azimuth (degrees)</b>	<b>Dip (degrees)</b>
